CEDARHURST NURSERIES

1921 PRICE LIST

Fruit Trees, Small Fruits, Shade Trees, Evergreens,
Shrubs, Vines and Herbaceous Perennials.

University Place, Nebraska
[Suburb of Lincoln, Nebraska]

The Cedarhurst Nurseries.

The Cedarhurst Nurseries, formerly the Home Nursery, L. O. Williams, proprietor, are now owned and managed by A. P. and H. F. Herminghaus.

The Nurseries are located at University Place, Nebr., (suburb of Lincoln) and can be reached by both the Lincoln Traction Co., and Interurban lines.

Stock will be supplied at the prices named herein as follows: Five of any one variety at the ten rate; twenty-five of any one variety at the hundred rate.

We give no warranty, expressed or implied as to quality, description, productiveness, or any other matter of any nursery stock that we sell.

We do not guarantee our stock to live and no allowance will be made for goods that fail to live after being planted. Our methods of handling and packing stock are up to date and goods will be in good condition when they leave our grounds. Our responsibility ends upon delivery to carriers. If goods suffer through delay in transit, claim should at once be made on the transportation company.

All claims for errors must be made within six days after receipt of goods, or they will not be considered.

We do not do a credit business. All orders must be accompanied by remittance. Exchange must be added to personal checks.

All goods shipped by express collect unless otherwise instructed.

We will be equipped to do planting, within the delivery limits of Lincoln, at the following prices:

EVERGREENS

Evergreens are a specialty with us and our collection includes only those varieties which are adapted to the Middle-West. We transplant and root prune our Evergreens frequently which practically insures their successful transplanting, even the larger specimens.

All the larger specimens are balled and baled.

Spruces and Cedars for hedges will not be balled and baled.

Hardy Herbaceous Perennials

PAEONIES—The planting season is September, October and Spring. Enrichment of soil brings liberal returns but do not permit manure to be placed next the roots. Plant the roots so that the crowns are two inches below the surface. The Paeony is the hardiest perennial grown. Free from diseases and insects, no dusting or spraying required. They are easily transplanted and require but little cultivation.
